Through literacy, we change lives. Literacy Chippewa Valley is a far-reaching agency that runs on the motto of, literacy changes everything. We believe that becoming well informed, well-read, and an active member of society can change lives, not only for those using our services but also for society as a whole.

***An Excerpt from “Will You Forgive Me?” by Tony Ross (Celebrate Writing 2019)***

*We all have a story, one that shaped us, molded us into who we are. My story has had a lot of negative, some positive. But at 50 years old, I have finally realized my story doesn't have to end with addiction, that I am in control of the ending and I can write the final chapters, ones that include sobriety, education, family, and happiness.*

*We don't have to let our past determine our future. Take control and start writing your own story, the story you want your life to be. Please, before you end up in jail, just know that you have opportunities through programs and determination, you are in control.*

*Write your own ending!*

When thinking of Literacy Chippewa Valley what do you think of? Our Family Literacy Program? Our Adult Basic Education Services? Our English Language Learner Services? Our 1:1 Tutoring Pairs Program? Our Jail Program? Currently our highest presence is within the Eau Claire, Chippewa, and Dunn County Jails which is where we are able to assist the highest number of individuals with 73% of our student population in 2018-2019 being within the jails.

Through hosting these programs we assist in populating the workforce for the community. We lift others up by giving them opportunities to become more and give even more back.

We lead by example taking our skills and putting them forth to allow for our community to grow. Becoming informed allows individuals to make decisions both for themselves and those around them.

All of our programs contribute not only to those taking advantage of them but also to society as a whole.

There are challenges that are faced within our programs though; these challenges are both simple and complex at the same time.

**What we need:**
